GLOBAL COMMUNICATION FOR MOBILE WORKGROUPS

Significantly increase the profit margin of your contracts

It is a proven fact that poor communication within construction is massively detrimental to contract performance and has a huge impact on budgets.

Research suggests this is the biggest challenge facing modern day construction and is accountable for extensive financial losses, which can often amount to more than 2% of the overall project value.

THE PROBLEM

There are many white papers detailing the problems and losses faced in construction which can be accredited to poor communication, this can account for losses of more than 2% of an overall contract value.

The many different tiers and stages in a construction project have in the past made it difficult to establish clear communication spanning the entire project. Often the situation is that information from the site office hits various mailboxes before being relayed to the site team or can often be lost in translation. This slows down the reactive response to requests and relayed information from site groups or the site as a whole.

THE SOLUTION

Developed by a construction professional, SITEcoms allows simple relaying of information instantly to the entire project including the site teams in a recorded communication via Email, SMS, and via SITECOMS.COM Web Login.

SITEcoms is easy to implement and offers a cost effective method of keeping everyone involved with the project in the Communication loop.

SITEcoms is very easy to use and allows the user to group contacts by company, trade or department giving the option of individual, group, multiple groups and project wide communication of critical information instantly.

SITEcoms assists with the planning and coordination of project phasing, offering a simple way to communicate information effectively to all, assisting with compliance to Health and Safety regulations and CDM duties. SITEcoms also provides an effective method of relaying documents and notices, giving the site community the ability to act upon instructions and changes to their dynamic working environment in the best possible time frame.

From Principal Contractor to Sub Contractor, SITEcoms offers an instant communication solution for offices both on and off site with onsite personnel and mobile work groups. This allows all involved to cut delay caused by poor or slow communication of critical information increasing profitability across the board.
